

New York Math Circle presents

Summer Workshop 2010 for Middle School Math Teachers

The Theorem of Pythagoras
When: July 26-30, 2010
Where: Bard College
Annandale-on-Hudson, NY

A week-long residential program led by NYMC instructors and Bard math professors. Engage in mathematical investigation, problem solving, and classes. Develop a deep understanding of the Theorem of Pythagoras and its consequences. Topics include geometric dissections, quadratic number system extensions, Diophantine equations, pythagorean triples, historical development, and a study of Euclid's original proof.
